

NAME-BRISHTI DHARA

BTECH/CSE/23/090

SDITO LAB AASIGNMENTS

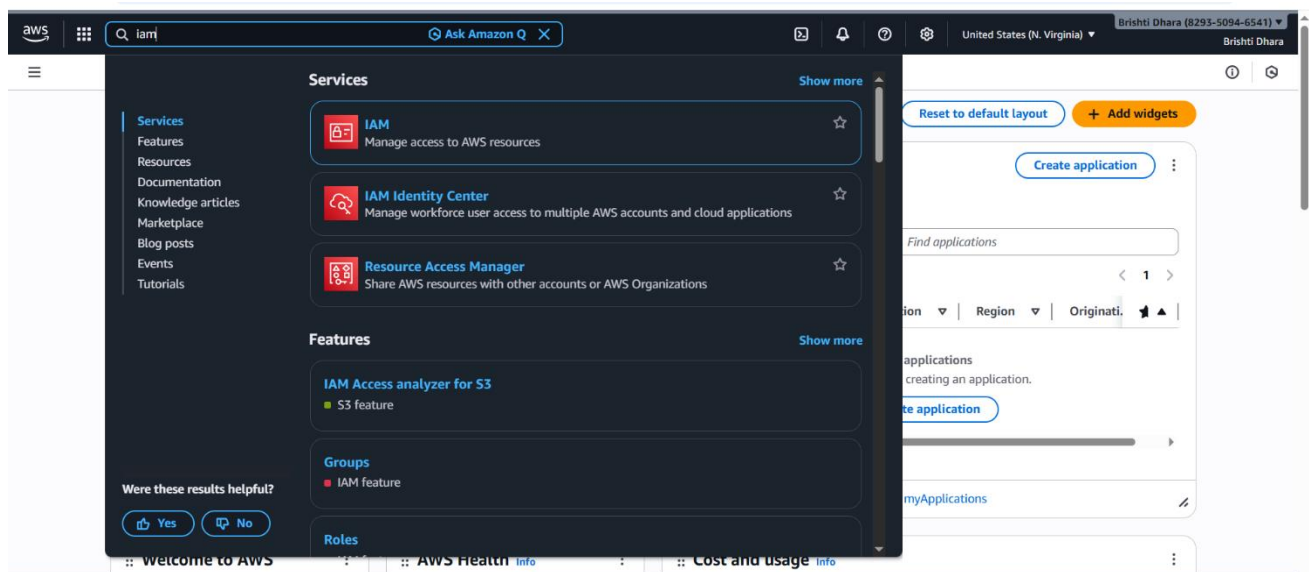

Assignment no :- 03 CREATE IAM USER AND GIVE FULL ACCESS TO S3

Solution :-

Step-1: At first login to the AWS console.

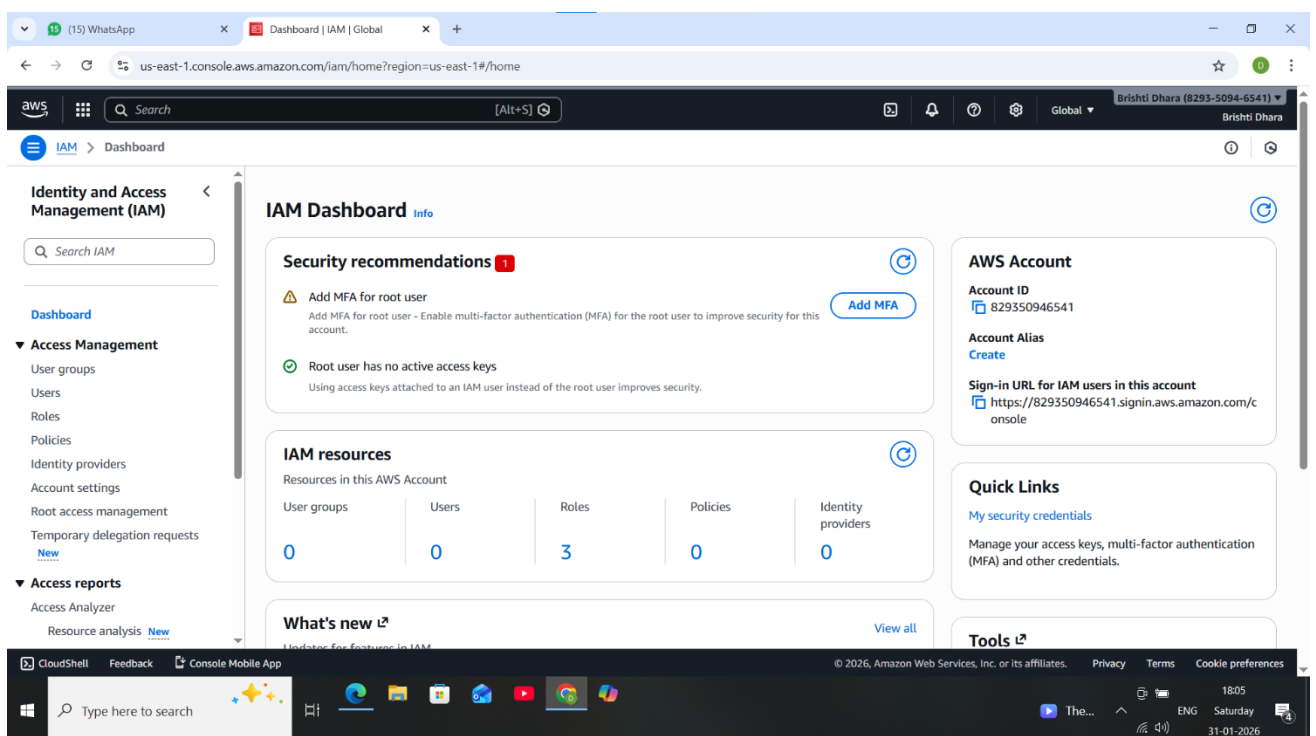

Step-2: Then search IAM in the search bar.

Step-3: After that click on the IAM service

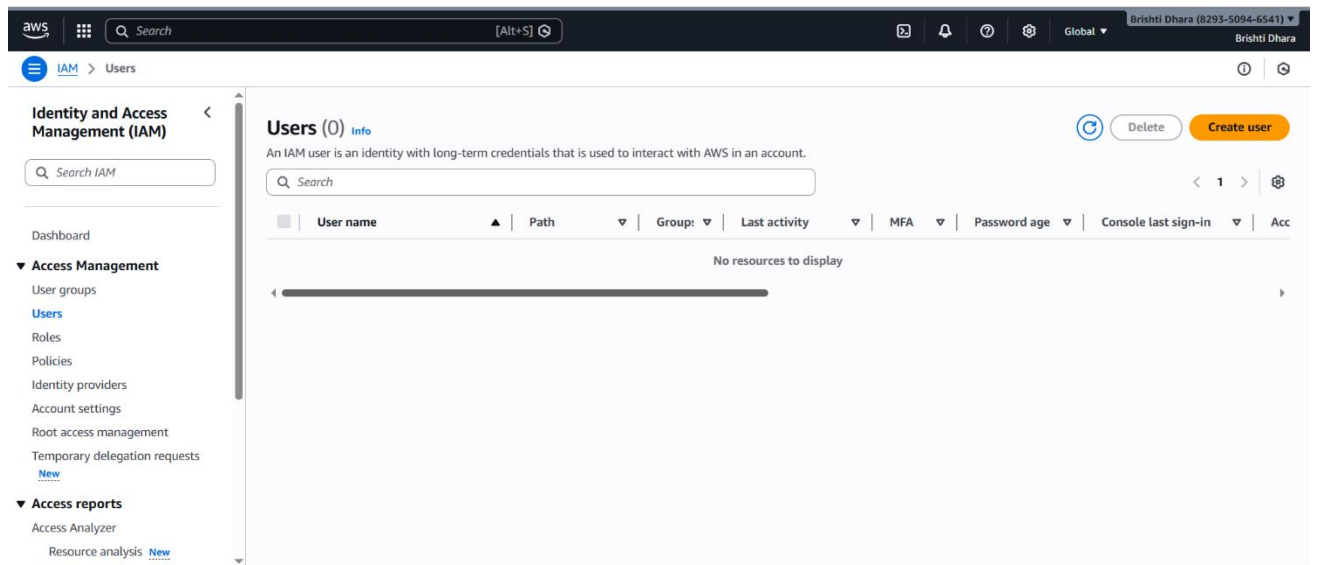

Step-4: Now we redirect to the IAM dashboard.

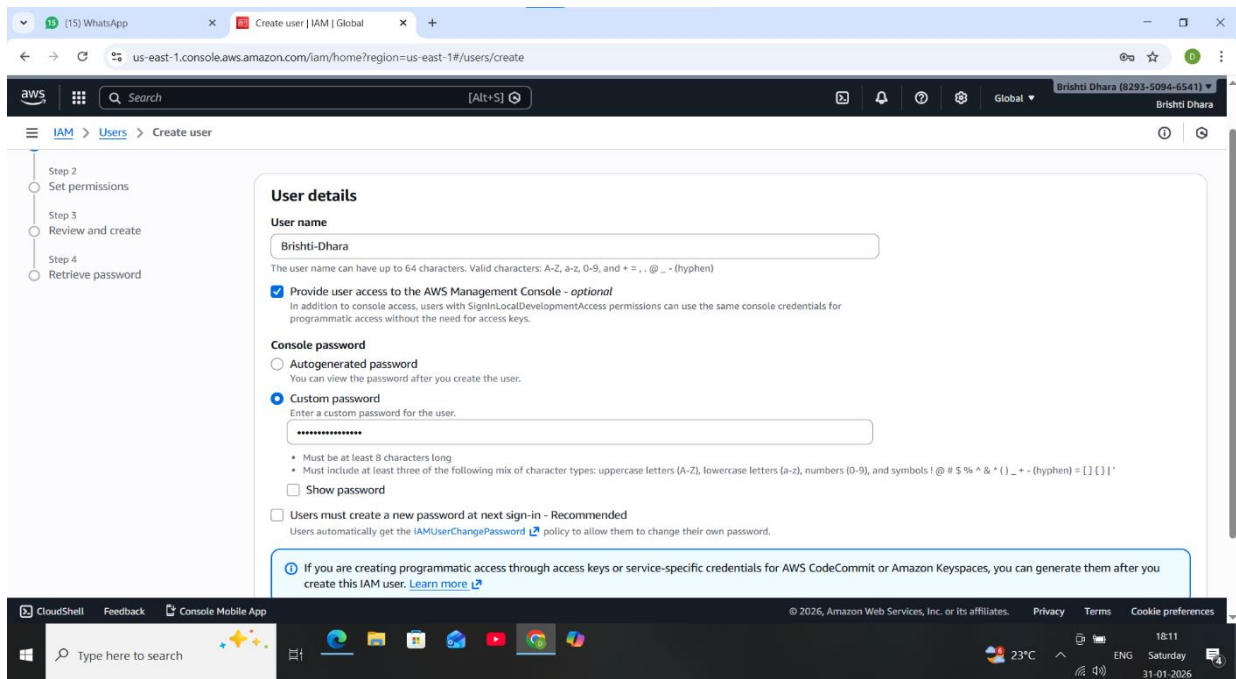

Step-5: In the IAM dashboard click on the users.

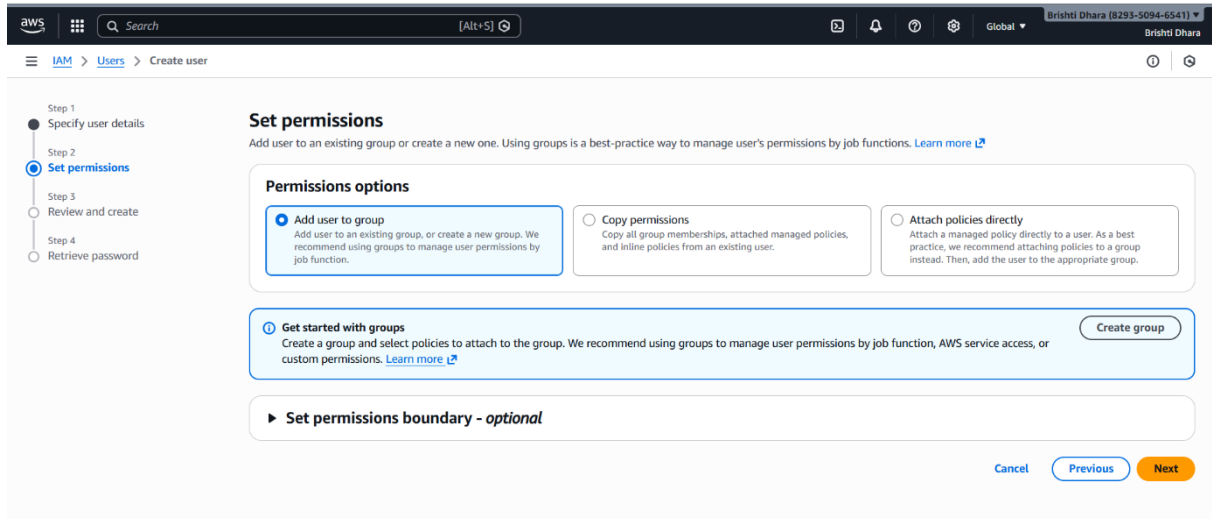

Step-6: After click on USERS we redirect to the user interface. Here we click on “Create user”

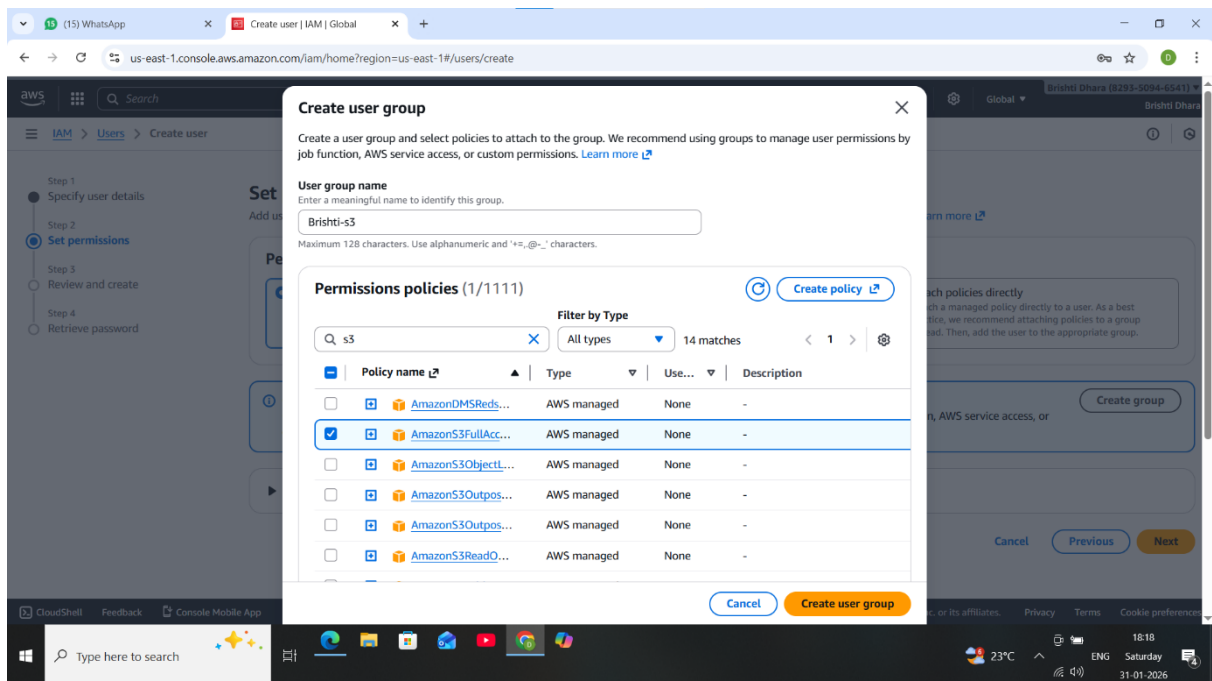

step-7: Then we need to create new user and after that give a click on the “Provide user access”.
Then set a custom password for future login. Next, if user wants to static his/her password then uncheck the “next-sign in box” , otherwise in every sign user need to create a password.

Step-9: Now we are in the “set Permission” interface. Here we need to create a permission groups, for that at first Click on the “create group”.

Step-10: After opening of “Create User groups”, there we need set a “user group name”.Then search S3 and give Tick on the “AmazonS3fullaccess” , then click on “create user group”

Step-11: Now the S3 name as “brishti-s3” is created. After that we need to click on of “brishti-s3”. Then Press “next”.

The screenshot shows the AWS IAM console 'Create user' wizard, specifically the 'Set permissions' step. The left sidebar shows the progress: Step 1 (Specify user details), Step 2 (Set permissions), Step 3 (Review and create), and Step 4 (Retrieve password). The main content area is titled 'Set permissions' and includes a sub-header 'Permissions options'. There are three radio buttons: 'Add user to group' (selected), 'Copy permissions', and 'Attach policies directly'. Below this is a table titled 'User groups (1)' with a search bar and a 'Create group' button. The table has columns for 'Group name', 'Users', 'Attached policies', and 'Created'. One group, 'Brishti-s3', is listed with 0 users and was created on 2026-01-31 (22 minutes ago). At the bottom, there is a link to 'Set permissions boundary - optional'.

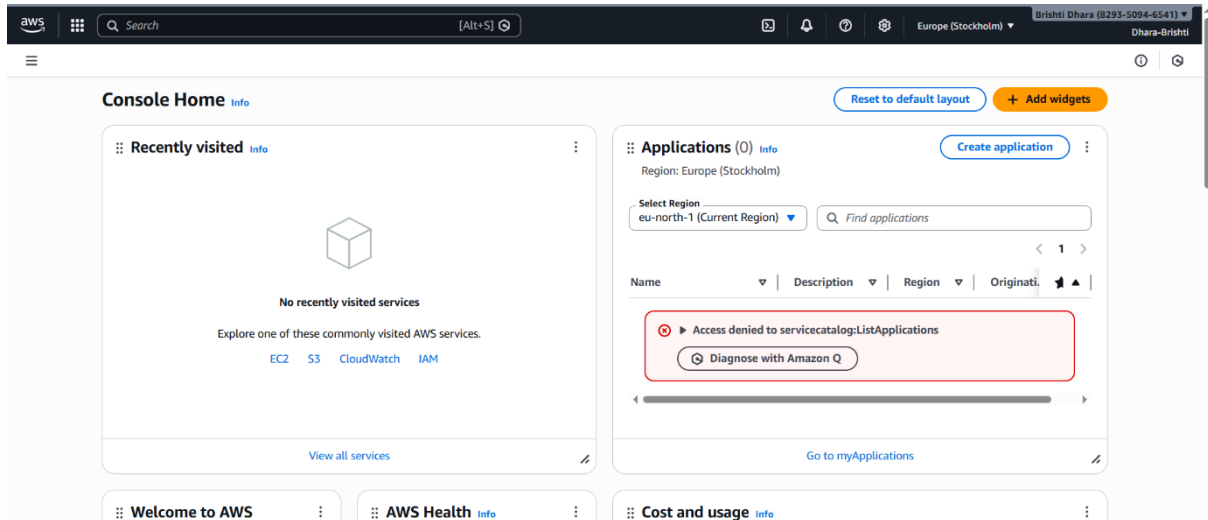

Step-12: So , now our user is created successfully.

The screenshot shows the AWS IAM console 'Create user' wizard, specifically the 'Retrieve password' step. The left sidebar shows the progress: Step 1 (Specify user details), Step 2 (Set permissions), Step 3 (Review and create), and Step 4 (Retrieve password). A green banner at the top states 'User created successfully' with a 'View user' button. The main content area is titled 'Retrieve password' and includes a sub-header 'Console sign-in details'. It displays the 'Console sign-in URL' as 'https://829350946541.signin.aws.amazon.com/console', the 'User name' as 'Dhara-Brishti', and the 'Console password' as a masked string with a 'Show' button. At the bottom, there are buttons for 'Cancel', 'Download .csv file', and 'Return to users list'.

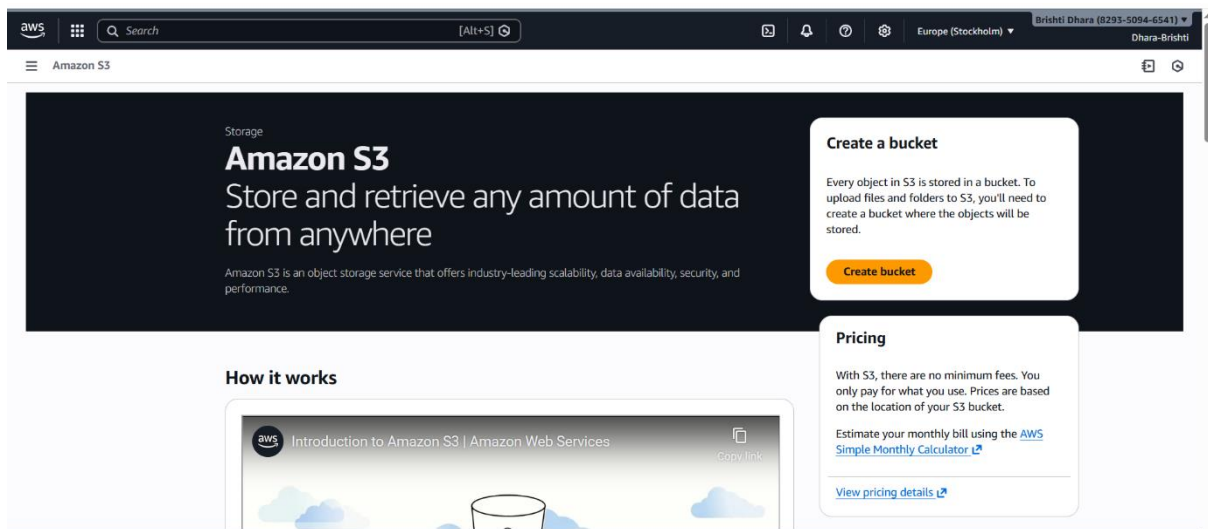

Step-13: sign-in as IAM user. Then copy the “console sign in url” and sign in as IAM user in incognito mode using the “User name and password” for checking

The screenshot shows the Amazon Lightsail IAM user sign-in page. The top navigation bar includes 'Provide feedback', 'Multi-session disabled', and 'English'. The main content area has the AWS logo and a large banner for 'Amazon Lightsail' with the text 'Lightsail is the easiest way to get started on AWS' and a 'Learn more' button. On the left, there is a sign-in form titled 'IAM user sign in'. The form includes fields for 'Account ID or alias (Don't have?)' (filled with '829350946541'), 'Remember this account' (checkbox), 'IAM username' (filled with 'Dhara-Brishti'), and 'Password' (masked). There are buttons for 'Sign in' and 'Sign in using root user email'. A 'Having trouble?' link is also present.

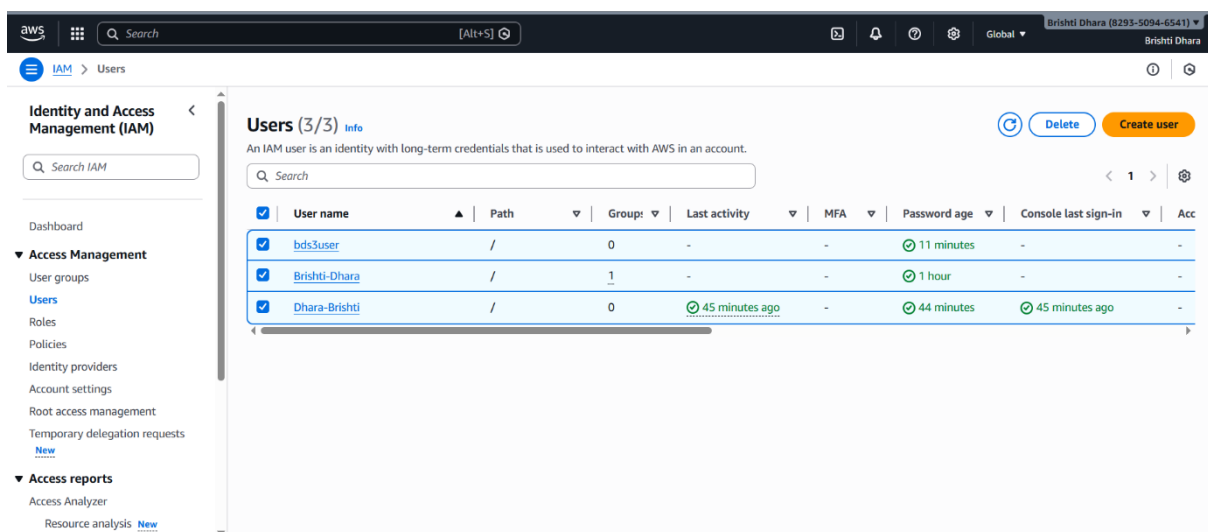

Step-14: Opennig of IAM user.

15. checking S3 permission in user by searching “S3” in search bar.

16. Atlast select the user name “dhara-brishti” and click on delete.

17. Now set confirm and delete user.
